

SS104 Under Counter Safe.

The SS104 Under Counter safe is the ideal replacement for your current point of sale Cash storage, Designed with a universal counter fitting, so is able to seamlessly replace some of the other safes on the market without the need for removing your existing bracket.

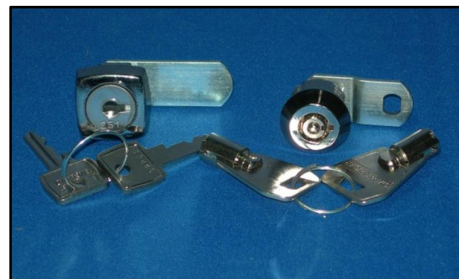

With a locked inner cassette, the safe can be removed from the Till counter and removed to a cash office or safe room before the cash is accessed.

The safe can also be supplied with a counter bracket for Outlets that don't currently have a under counter safe solution.

Safe dimensions Height 215mm x 190mm deep (230mm with handle) width 104mm (118mm including top plate). Optional counter bracket Height 30mm x 165mm deep x 122 wide.

Optional UK Lowe & Fletcher manufactured locks are also available giving a complete customised solution. Locks numbers can be specified for the front, back or both locks on the SS104 allowing the store to have one key to unlock all till safes from the till points and perhaps a more secure single Key once the safe is in a secure room.

A Video of the SS104 is available on www.Youtube.com search for "SS104 Retail Counter safe"
