

CountEasy TS & CountEasy TS IP

**LESS**

**IS**

**MORE**

**LESS** handling  
**LESS** mistakes  
**LESS** downtime  
**LESS** shrink  
**LESS** complexity

**MORE** profit

With its ground breaking touch screen technology, the new **CountEasy TS** delivers greater cash handling efficiencies than any other count by weight scale in the world. And yet it is so simple to operate that your staff will need virtually no training to use it.

Like your mobile phone or tablet, the high resolution full colour TFT screen only displays those functions that you need when you need them. Universally recognisable iconography and intuitive design mean that complex functions can now be performed easily by operators.

Six times faster than counting by hand, the **CountEasy TS** is ideal for speeding up spot checks, cash lifts, banking, shift changes and end of day reconciliation.

The new **CountEasy TS** allows a multi-cultural workforce with minimal training to accurately count and record the contents of multiple tills, if appropriate in multiple currencies. It is also fully configurable to streamline any cash handling process.

# CountEasy TS & CountEasy TS IP

## LESS is MORE

- LESS handling** Six times faster than counting by hand, reducing time wasted counting cash
- LESS mistakes** Provides 100% accurate counts first time, every time, eliminating errors
- LESS downtime** Fast counts mean less downtime during normal trading and shift changes
- LESS shrink** Increases accountability and reduces the opportunity for cash loss
- LESS complexity** Touch screen technology speeds up and simplifies all counts – even complex ones

## BENEFITS OF THE COUNTEASY TS & COUNTEASY TS IP

- Intuitive design and menu driven software make using the CountEasy TS so simple that practically no training is required
- The use of universal iconography, rather than words or abbreviations, makes it perfect for multi-cultural environments
- Counts up to 200 tills around your store.
- Operates with mains or rechargeable battery so it is fully portable and can be used anywhere it is needed, even when fitted with an optional printer (order CountEasy TS IP)
- Intelligent battery management software means the CountEasy TS can operate for an entire day on battery power.
- The battery pack is fully rechargeable in just over 3 hours
- Non volatile memory means that data will not be lost in the event of an unexpected power failure
- No need to manually key in data. The TS, with fully configurable comms options, uploads all data to any cash spreadsheet or back office system quickly and simply – eliminating keying errors and saving time
- Keeps a real-time running total, so you always know where you are in the count, with real time running clock and date stamp for audit integrity
- Use CountEasy TS to set your floats, check coin bags and note bundles and to balance a drawer quickly, even in front of customers in case of a change dispute. Coins can even be counted whilst still in their till cups, making counting quick and simple
- Adding a printer allows the cashier to sign a hard copy of every count, providing a clear audit trail
- Unlike some machines there is no need for regular recalibration
- Complete peace of mind with Volumatic's highly respected customer support offering, which includes a three year box swap warranty
